The Department of Natural Resources is providing this report to satisfy the requirements of the "Procedures Concerning Certain Licenses Act", IC 14-11-4, and its associated administrative rule, 312 IAC 2-3. The application files are available for public inspection at the Division of Water's office in Indianapolis. Please contact the Division's Technical Services Section at (317) 232-4160 or the toll free number 1-877-928-3755 to make an appointment for file review. Photocopies may be made for a nominal charge of \$0.10 per 8 1/2 " X 11" copy.

A pre-action public hearing on an application may be requested by filing a written petition with the Director, Division of Water:

Michael W. Neyer, P.E., Director Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

For a petition to be considered valid it must:

- 1. Contain the typed or legibly printed name and complete mailing address of each petitioner;
- 2. Be signed by a minimum of 25 individuals who are at least 18 years old and either reside in the county where the project will take place or own real property within 1 mile of the project site;
- 3. Affirm that each signatory to the petition satisfies the requirements of item 2; and
- 4. Identify the application for which the public hearing is being requested either by the application # or the applicant's name and the project description.

A petition which does not meet these requirements will be considered invalid and the hearing request will not be granted.

A person may request that the Department provide written notice of its action on an application by filing a written request with:

Division of Water Room W264 402 West Washington Street Indianapolis, Indiana 46204

The request must identify the application by either the application # or the applicant's name and the project description.

Application # : DR-468

Lake : Pretty Lake

Applicant : *Indiana Department of Natural Resources

Division of Water Traci Powell, PE

402 West Washington Street, Room W264

Indianapolis, IN 46204-2641

Description : The lake level control structure will be replaced. Two existing deteriorated 30"

CMPs will be replaced with a new 5' long x 3' wide concrete box culvert. The lake level gate and sill will be replaced in the same size as the existing. A temporary coffer dam will be placed upstream of the structure during construction. Also, two new concrete block retaining walls will be constructed at the downstream end of the new structure along the outlet channel. In addition, 2' wide backfill will be placed on both sides of the new box culvert and will consist of compacted and crushed limestone per INDOT specifications. Details of the project are contained in information and plans received at the Division of Water on December 18, 2006.

Location : At the Pretty Lake Control Structure; approximately 200' downstream of the

mouth of the outlet channel

near Stroh, Milford Township, LaGrange County

SE14, SE14, NW14, Section 15, T 36N, R 11E, Stroh Quadrangle

Application # : FW-24100

Stream : West Fork Sly Run

Applicant : *Indiana Department of Transportation

Richard L Phillabaum

100 North Senate Avenue, Room N642

Indianapolis, IN 46204-2216

Description : The two separate 120" corrugated metal culvert crossings over West Fork Sly

Run (90' long and 70' long with a 50' opening gap) under State Road 38 and Little Chicago Road will be replaced with a single 20' by 6.5' by 300' long 3-sided concrete culvert due to intersection widening and added turn lanes. The vertical profile at the intersection is being raised 6.5' due to poor intersection sight

distances. The ends of the new culvert will have concrete wing walls and will be protected from scour by class II riprap. An E-7 inlet with a connecting pipe will be

used to drain the area that was previously open between the two original

crossings. Additional information will be added as the project is further reviewed.

Details of the project are contained in information and plans received at the

Division of Water on December 8, 2006.

Location : At the intersection of State Road 38 and Little Chicago Road

Application # : FW-24101

Stream : State Ditch

Applicant : City of Indianapolis

Department of Public Works

William V Bowman 604 North Sherman Drive Indianapolis, IN 46220-2563

Description

: A series of eleven outfall structures will be constructed along State Ditch. One outfall ditch that runs along the north side of Kentucky Avenue will also be constructed. The outfall structures will be utilized to improve drainage for the neighborhood and provide relief to the combined sewer system by eliminating the majority of stormwater flow into the system. Four discharge structures will be located along the west bank of State Ditch and seven discharge structures will be located along the east bank. The outfall pipes will be 18"-24" in size and will be connected to check valves to prevent backflow into the outfall structures and connected system. Riprap will be placed below the outfall pipe along the bank to prevent erosion. Specific project information will be added to the description as the application is further reviewed. Details of the project are contained in information and plans received at the Division of Water on December 11, 2006.

Location

Along State Ditch, from Bradbury Street to Perry Street between Rybolt and Lyons Avenues. A drainage ditch wthat will receive discharge from Area 4 is located on the north side of Kentucky Avenue between Maywood Road and Raymond Street.

Application # : FW-24103

Stream : Abner Creek

Applicant : Executive Homes Inc.

Peter Gray

8499 Fishers Center Drive Fishers, IN 46038-2318

Description : Approximately 90' of Abner Creek's eroded west (right) streambank will be

stabilized with riprap to protect the bank from further erosion. The riprap will be keyed into the streambed at its base and will conform to the existing bank at the project limits. It will have a maximum height of 8" and a maximum streamward projection of 4' beyond the existing bank. An 8' steel sheet piling seawall will be constructed landward of the riprap placed for bank stabilization. The sheet piling will be installed a minimum of 4' from the normal water level and to a minimum depth of 1' below the flowline of the creek. Clean sand and gravel will be used as backfill landward of the seawall, and up to 2' of riprap will be placed on top. Specific project information will be added to the description as the application is

received at the Division of Water on December 12, 2006.

Location : 4900 East County Road 100 South, Lot 14, Parks of Prestwick Phase 1;

approximately 1600' east and 400' north of the County Road 100 South and

further reviewed. Details of the project are contained in information and plans

Lake : Pretty Lake

Applicant : *Indiana Department of Natural Resources

Division of Water Traci Powell, PE

402 West Washington Street, Room W264

Indianapolis, IN 46204-2641

Description : The lake level control structure will be replaced. Two existing deteriorated 30"

CMPs will be replaced with a new 5' long x 3' wide concrete box culvert. The lake level gate and sill will be replaced in the same size as the existing. A temporary coffer dam will be placed upstream of the structure during construction. Also, two new concrete block retaining walls will be constructed at the downstream end of the new structure along the outlet channel. In addition, 2' wide backfill will be placed on both sides of the new box culvert and will consist of compacted and crushed limestone per INDOT specifications. Details of the project are contained in information and plans received at the Division of Water on December 18, 2006.
